DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 34-40,42,48 and 50-53 are rejected under 35 U.S.C. 102(b) as being anticipated by Grutza et al.

Grutza et al. teaches a method of creating a spiral or helical shaped groove in a surface of a collector ring of an electrical motor of an industrial generator, wherein the collector ring remains coupled to at least a portion of the electrical device, (col. 1, lines 15- 20), the method comprising cutting the groove in the surface of the collector ring using a rotary grinder, (col. 1, lines 25-41), located on a support that allows for lateral movement along the surface of the collector ring, (col. 1, lines 50-52).

Allowable Subject Matter

Claims 41 and 49 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Papayoti and Rao et al were cited to show other examples of collector rings.
